Event Description
<p>The Installation ceremony of ISHRAE student chapter of AIKTC was conducted on 12th October 2024 for the student members through Google Meet (Online). The purpose of the ceremony was to formally install a student committee for the year 2024-2025.</p> <p>The event began at 11am with the opening remarks from Baseem Dabholkar, Event head, who welcomed attendees and highlighted the significance of the event. The session began with high note from Mr. Siddiqui Kazi sir who first interacted with students on brainstorming questions about the problems students facing while placements and possible reasons behind the same.</p> <p>Mr. Siddiqui Kazi sir then explained step by step the road to crack any interview, adding the importance of mini projects, theoretical knowledge and industry exposures including internships and problem analysis. He then cleared the doubts of all the students and provided a clear path making insights for future. At last, He provided his email for future contact and Baseem Dabholkar concluded the session.</p> <p>We have successfully concluded Expert Talk of ISHRAE. We will be arranging more expert sessions and technical programs during this academic year 2024-25. On behalf of the committee, we thank the host for their presence and look forward for their support.</p>

Siddique (Presenting)

Why the Gap Between Education and Industry Matters

Theory vs. Practical Application

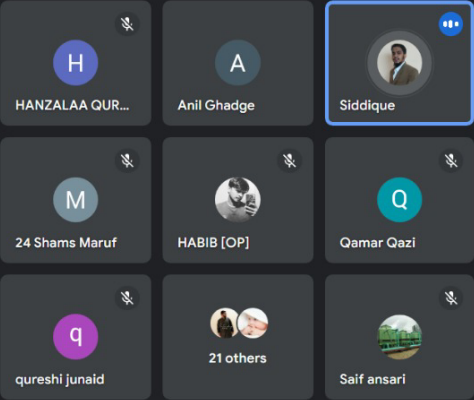

Academic environments emphasize theoretical knowledge, while industries demand practical problem-solving and application of skills.

Challenges Faced by New Graduates

Difficulty applying classroom knowledge to real-world problems.
Lack of experience with industry tools, technology, and workflows.
Soft skills (teamwork, communication, adaptability) often underdeveloped.

Evolving Industry Demands

Rise of Industry 4.0: Digitalization, automation, AI.
Sustainability and green engineering are becoming more crucial.
Employers expect not just technical proficiency but innovation and adaptability.
