

Rooting for a Greener Future: NSS Tree Plantation Initiative Report

The National Service Scheme (NSS) unit at Anjuman-I-Islam Kalsekar Technical Campus actively engages in various community service initiatives to foster social responsibility and environmental consciousness among students. One of the flagship activities organized by NSS is the annual tree plantation drive, aimed at enhancing green cover on campus and promoting sustainable practices.

The primary objective of the tree plantation activity at Anjuman-Islam-Kalsekar Technical Campus is to increase the campus green cover. Raise awareness among students about the importance of trees in environmental conservation. Encourage active participation in community service and environmental sustainability initiatives. To foster a sense of community responsibility towards environmental stewardship. To provide participants with practical experience in tree planting and care techniques. To develop teamwork, leadership, and organizational skills among volunteers. To create a sustainable impact by planting trees that will benefit future generations. To inspire ongoing community involvement in environmental initiatives beyond the initial event

The first tree was planted by the dean Dr. Rajendra Magar and director Dr. Ramjan Khatik. The college backyard area was the perfect fit for the tree plantation. All the preparation phases were taken into consideration like arrangement of necessary tools, equipment, and materials for planting.

On **23/7/2024** the tree plantation activity took place. All the coordinators guided all the NSS volunteers about the tree plantation activity. All the students came to know about its benefits and the social impact as well.

It led to an increase in green cover of the campus, improved the air quality, and the whole community bond was strengthened towards the common goal.

NSS not only enhances the environment but also cultivates a sense of responsibility towards nature and future generations.
