Feedback Analysis And Action Taken Report 2022-23

Feedback involves focusing careful consideration, reflecting, and then formulating the best course of action for improving performance. It offers positive criticism and enables everyone to recognize what needs to be changed to enhance their concentration and performance. Feedback promotes personal and professional growth.

The Centre For Teaching And Institute Feedback of the institute designs and the feedback co-coordinator collects feedback from the students to precisely monitor the performance quality on curriculum and the related issues and attempts to make improvements.
